

Product	Strongweld 185 Infinite - 220V 50Amps plug - SCR control		
Description	Strongweld 185 is a new compact, lightweight, microprocessor-controlled welding inverter suitable for MIG/MAG welding processes. Is the ideal equipment for more experienced welders operating also in non-industrial working conditions. The "synergy" helps the novice user to adjust correctly the welding parameters: simply select the desired combination between wire diameter, gas type and thickness to be welded; and the wire speed will be adjusted automatically by the machine.
